# ABOUT HERMES

HERMES Industrial Estate (HERMES I.E.) is operated by HERMES Cooperation Company Limited, a wholly owned subsidiary of SNC Former Public Company Limited (SNC), in collaboration with the Industrial Estate Authority of Thailand (I-EA-T).

HERMES I.E. is strategically located in Khao Mai Kaeo Subdistrict, Bang Lamung District, Chonburi Province—within the designated promoted zone of the Eastern Economic Corridor (EEC)—and is well-connected to major transport routes and logistics hubs, providing an ideal base for businesses targeting both regional and international markets.

The estate spans approximately 1,231 rai (approx. 1,969,600 square meters), with approximately 762 rai (approx. 1,219,200 square meters) allocated for industrial lands, and is positioned for future expansion to accommodate rising demand and support sustainable long-term industrial growth.

SNC Former Public Company Limited, established in 1994 by Dr. Somchai Thaisanguanvorakul, is a leading Thai manufacturer of air conditioner parts, household appliances, and car AC components. With strategically located factories in Samut Prakan and Rayong, SNC has expanded into OEM production in 2007 and now serves major global brands with a wide range of electronics—including air conditioners, TVs, and refrigerators—supported by advanced technology and many decades of expertise.
